Interference Report

In Fall 2018, and again in recent months, the station has received various complaints about WDPR-FM 88.1 suddenly going off the air. Virtually all of the complaints point to an outside source of interference, and have come from areas East and Northeast of Dayton. These outages should not be confused with FM static, and seem to last for about 15 minutes. In order to determine the cause of interference, the station and the Federal Communications Commission (FCC) are asking for your assistance.

If you experience an outage of the station, please note the following.

1. Date

- 2. Time
- 3. Location (If not a specific address, than neighborhood or intersection, etc)
- 4. Antenna (built into the radio, indoor or outdoor)
- 5. Duration of the Interference
- 6. What does it sound like? For example: noise, or audio from another station, etc.

- 7. If voice or music, what did you hear?
- 8. Do you have recordings of the interference?
- 9. Weather conditions
- 10. Your name
- 11. Your address
- 12. Phone number
- 13. Email address
